SUMMARY

Senior Data Scientist with 7+ years of experience delivering end-to-end AI, Data Science, and Machine Learning solutions across Retail, Manufacturing, and Finance-Banking sectors. Specialised in Generative AI (LLMs, RAG, Chatbots), Statistical and Predictive Modelling, and Data Strategy. Proven record of improving model accuracy by 25%, reducing operational downtime by 60%, and driving \$13M in customer lifetime value optimisation. Skilled in translating complex business challenges into scalable, data-driven solutions using Python, SQL, and cloud platforms (AWS, GCP, Azure).

TECHNICAL SKILLS

- **Languages:** Python, SQL, R
- **Libraries/Frameworks:** Pandas, NumPy, NumPy, Scikit-learn, PyTorch, TensorFlow, PySpark, Hugging Face, Flask, FastAPI
- **Machine Learning & Generative AI:** Supervised & Unsupervised ML (Classification, Regression, Clustering), NLP, Transformers, RAG, LLM Agents (CrewAI, LangGraph, ReAct), Prompt Engineering, Time Series Forecasting, A/B Testing, Experimentation, Hypothesis/Causal Inference, Deep Learning (RNN, LSTM, GNN), LLM Fine-tuning, Model Deployment, MLOps
- **Cloud & DevOps:** AWS (SageMaker), GCP, Azure, Docker, Airflow, Kubeflow, MLflow, CI/CD, ETL Pipelines
- **Databases & BI Tools:** PostgreSQL, BigQuery, Snowflake, Tableau, Power BI, Looker
- **Domains/Areas:** Retail, Banking & Finance, Manufacturing, Product and Marketing Analytics, Customer Analytics, Segmentation, Recommendation Systems, CLV Modeling, CRM/CDP, Google Analytics, Anomaly Detection

WORK EXPERIENCE

Senior Data Scientist | IBM | Bengaluru, India | Apr 2024 – Present

Key Projects: Cost forecasting model, GenAI Assistants (Interactive Chatbots), A/B Testing, Pokémon Game Analytics Engine, Object Detection, Credit Risk Modeling, Customer Segmentation

- Led the development of GenAI LLM-based RCA Assistant for Network Operation Centre that reduced network downtime by 60% and improved root cause detection accuracy.
- Prepared dataset, built and deployed YOLO-based object detection engine improving image classification accuracy by 20%.
- Designed and implemented a GenAI-powered RAG based Meeting Summarizer Assistant integrated with ServiceNow to automate KPI extraction and incident creation, accelerating issue resolution by 40%.
- Led the development of a GenAI-powered RAN AI Assistant using a React Agent to handle internal network configuration queries, improving issue resolution speed and operational efficiency by 45%.
- Developed Cost forecasting model, enhancing existing model accuracy by 20% and increasing business revenue by 30% through the customer retention improvement.

- Designed and executed A/B tests on new product features, resulting in a 25% increase in user engagement.
- Collaborated with product and business teams to design experiments, analyse user engagement metrics, and drive data-informed product decisions.

Data Scientist | Tredence Analytics | Bengaluru, India | Oct 2021 – Mar 2024

Key Projects: Customer CLTV Prediction, A/B Testing, Next Best Action, Propensity Modeling, BNPL, Tableau BI metrics view for key stakeholders

- Led customer analytics team delivering multiple predictive modelling and advanced analytics solutions end-to-end.
- Developed CLTV ML model identifying \$13M in customer lifetime value opportunity.
- Developed recommendation-based Next Best Action (NBA) machine learning framework to convert first-time shoppers into repeat and loyal customers across multiple product segments, resulting in a 20% increase in second-time transactions.
- Implemented uplift modelling and designed A/B experiments to optimise marketing campaign conversion and user engagement, increasing email subscriptions by 19%.
- Delivered actionable insights and Tableau dashboards to product managers, Marketing Team, Customer Analytics Team, supporting KPI design, performance measurement, and strategic decision-making.

Data Scientist | Network Corp | Bengaluru, India | Aug 2019 – Sep 2021

Key Projects: Failure Prediction System, Time Series Forecasting, Customer Segmentation Power BI metrics view key stakeholders

- Performed EDA on large datasets to identify modelling feasibility and extract actionable insights.
- Developed LSTM-RNN time series predictive model for sensor failure prediction, improving accuracy by 19%.
- Created demand forecasting models and built ETL and ML pipelines using Python, PySpark, and Pandas on Azure.
- Designed Power BI dashboards for monitoring machine health and anomaly detection.
- Deployed and managed ML models ensuring continuous improvement in production.

Analyst | ASPL Info Services | Bengaluru, India | Sep 2018 – Jul 2019

- Built ML models for anomaly identification and user activity monitoring in security logs.
- Performed threat analysis using Python scripting and deployed Splunk applications in multiple environments.

EDUCATION AND CERTIFICATIONS

- Bachelor of Engineering (Computer Science), BMS Institute of Technology, Bengaluru, India - 2018
- Data Science with Python and R – edWisor, Bengaluru, India – 2019
- Data Science (Advanced) and Tableau - StackRoute by NIIT, Bengaluru, India – 2021

PUBLICATIONS

- Improving the Learning Capability of Students in Classroom Using Augmented Reality – Published in International Journal of Computer Science and Network (IJCSN), 2018 (Paper ID: IJCN-2018-7-2-106).
